

UNIT4[®] SYSTEM QUICKSTART GUIDE

- STEP 1** Remove the breakaway tab at the bottom of the TPAK[®] before loading into magazine.
- STEP 2** Hold the TPAK vertically. Align the grooves inside the magazine with the CO₂ cylinder.
- STEP 3** Insert the TPAK fully into the magazine, using the grooves as a guide until you can no longer push the cartridge forward.
- STEP 4** Swing the bottom door closed.
- STEP 5** Push the latch clip through the bottom door carabiner. Ensure the carabiner snaps back into position, locking the clip into place.
- STEP 6** Close the draw latch with one fluid motion, applying adequate pressure to fully close the magazine.
- STEP 7** Upon closing the magazine, the CO₂ canister will be punctured and ready for use with the UNIT4 training rifle.

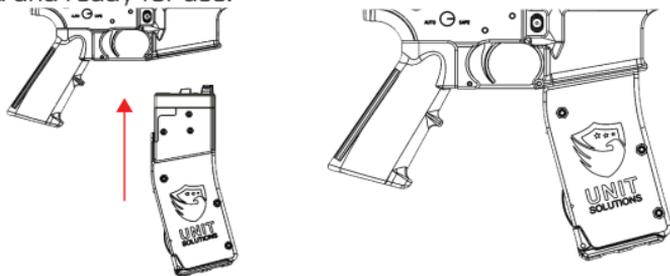

WARNING: When inserting the TPAK into the magazine, always point the bottom of the magazine downward and away from your body or another person.

LOADING THE MAGAZINE

Place the system on safe. Ensure the bolt is locked to the rear and the system is loaded from the open bolt position. Insert the magazine into the magazine well until you feel it click into place. Once fully inserted the UNIT4 is loaded and ready for use.

REMOVING THE TPAK

- STEP 1** Eject the magazine by pushing the magazine catch button and pulling the magazine downward.
- STEP 2** Using your finger, depress the latch spring and pull open the draw latch. Remaining gas will expel once the draw latch has been released.
- STEP 3** Press the gas release valve to allow any remaining gas to expel. Push the carabiner into the bottom door to release the latch clip. Open the bottom door and remove the TPAK.

WARNING: When inserting the TPAK into the magazine, always point the bottom of the magazine downward and away from your body or another person.
